A Message to the Penn Community

September 22, 2023

Dear members of the Penn community,

As many of you are aware, Penn Police responded yesterday to reports of an individual shouting antisemitic obscenities and overturning furniture at Penn Hillel. The individual was determined to be in crisis and was quickly and safely removed and referred for medical evaluation. This troubling incident came in the wake of another upsetting occurrence at the Weitzman School of Design, where a group of students found a swastika painted on the wall of a spray booth, a small room that is used for painting projects, on the fourth floor of Meyerson Hall. Dean Frederick Steiner [wrote](#) to the Weitzman community immediately after learning of the incident. The image was also quickly removed. Penn Police is actively investigating this incident and encourages anyone who may have information to please contact the Division of Public Safety at (215) 573-3333.

We unequivocally condemn such hateful acts. They are an assault on our values and mission as an institution and have no place at Penn. Sadly, incidents of hatred, including antisemitic rhetoric and acts that denigrate Jewish people, have become all too common. That these incidents happened on our campus, in our spaces, is deeply unsettling. We also [acknowledge](#) the timing of these incidents is particularly difficult given the controversial speakers who will be participating in the event on our campus over the coming days. It is our collective responsibility as a community to stand clearly and strongly against antisemitism.

We are unwavering in our commitment to ensuring our Jewish community feels safe and supported on our campus. The Division of Public

Safety is actively pursuing both incidents and following all protocols for potential bias incidents on campus. They are also continuing to provide increased security coverage and support to Penn Hillel, conducting special checks at Lubavitch House, and working to determine appropriate security measures for Jewish students living in on- and off-campus housing.

We are also in active conversations with campus- and community-based organizations (an example is [here](#)) including Penn Hillel and the Office of the University Chaplain, and consulting the [U.S. National Strategy to Counter Antisemitism](#) to guide our efforts to combat antisemitism on our campus broadly. Here are a few actions that are already underway:

Training and education: We are reviewing and building upon our existing training and education programs to ensure we are including antisemitism awareness as part of our equity and inclusion programs for faculty, staff, and students.

Community connection: We are redoubling our work with student organizations and other groups to encourage efforts to understand the interconnectedness of different forms of bigotry and oppression. We will continue working with the Office of the University Chaplain and the Division of University Life to bring people together to learn from and with one another.

The University of Pennsylvania has a long and proud history of being a place for people from all backgrounds. Hateful acts like this sow fear and anxiety, and many members of our community are hurting right now. Please check in with your friends and colleagues and let them

Penn Live Arts Receives Center for Arts & Heritage Grant for Three-Year Rennie Harris Residency

Penn Live Arts (PLA) has received a \$360,500 grant from the Pew Center for Arts & Heritage in support of a three-year residency with Rennie Harris and his company, Rennie Harris Puremovement (RHPM). The grant includes both project funding and an additional 20% in unrestricted, general operating support. Beginning in September 2023, the residency will provide the hip-hop choreographer with a platform to explore his artistic vision and to generate new work commissioned by Penn Live Arts.

Following successful collaborations with Mr. Harris and RHPM in 2022 (*LIFTED*) and 2023 (*Rome & Jewels*), the three-year residency will explore pressing social issues such as gun violence, a thematic focus in PLA's 2023-24 season, allowing Mr. Harris to respond through his own creative process and engage multiple communities by using hip-hop as a language of reflection, resistance and renewal.

"We're thrilled to have the opportunity to deepen the artistic work we've already begun with Rennie Harris," said Penn Live Arts executive and artistic director Christopher Grunits. "This new, extended relationship allows us to support the vision of a globally significant Philadelphia artist and partner in the creation of new work, while elevating important and relevant issues for our community. We are deeply grateful to the center for making this residency possible."

The first year of the Rennie Harris residency will revisit highlights of the choreographer's catalogue with the presentation of the acclaimed *Students of the Asphalt Jungle*, *March of the Antman*, and *P-Funk* alongside current repertoire *A Day in the Life* and *The Word* to explore gun violence and gangs (March 22–23, 2024). The second and third years will explore what new work looks like

Penn Nursing: \$1 Million Grant to Support Nursing Education

The University of Pennsylvania School of Nursing has received a \$1 million grant from the Bedford Falls Foundation—a donor-advised fund established by Philanthropists William (Bill) E. Conway Jr., co-founder and co-chairman of the Carlyle Group, and his wife, Joanne. The couple has given millions to support nursing education and scholarships to address the nation's nursing workforce shortage.

The \$1 million grant to Penn Nursing will support a total of 40 high-merit, high-need students over a four-year period who are enrolled in Penn Nursing's Master of Professional Nursing (MPN) degree program. Ten students will be selected every year to receive this support and they will be known as Conway Scholars.

"Penn Nursing is incredibly grateful for the generous support from the Conways and the Bedford Falls Foundation," said Penn Nursing dean Antonia Villarruel. "A commitment like theirs helps make a world-class education available for all students by minimizing their debt burden. This grant will help us prepare the next generation of nurse leaders to meet our country's changing health and healthcare needs."

"Our country continues to grapple with a nursing shortage which is only projected to get worse as the need for healthcare grows," said Bill Conway. "We are excited to partner with Penn Nursing in supporting high quality nursing education and training. We are certain that reducing the financial burden placed on nursing students will help combat this critical shortage."

The MPN is an accelerated, fast-paced 15-month full-time program for students with a non-nursing undergraduate degree who want to pursue a nursing degree and attain an RN license. The four-semester plan of study sequentially builds robust skills in population health, health equity, interprofessional collaboration, care transitions, and systems thinking to advocate for better healthcare. The program draws on rich academic partnerships with regional clinical sites to provide the experiential foundation required for nurses to play leading roles in delivering high-quality and accessible care across varied settings and populations.

Women of Color Day 2024 Awards Call for Nominations: October 27

To Members of the University and Surrounding Community:

The National Institute for Women of Color (NIWC) proclaimed March 1 National Women of Color Day. Penn, HUP, Presbyterian and Pennsylvania Hospital seek to increase our awareness of the talents and achievements of women of color by recognizing those who support women of color, regardless of their sex, gender, race, or other status, with the Women of Color Award.

The Women of Color Awards are given in recognition of individuals who have conscientiously endeavored to increase respect for women of color at Penn, Hospital of the University, Presbyterian, Pennsylvania Hospitals and the Delaware Valley community. Annually, awards are given in up to six categories:

- Helen O. Dickens Award: must have demonstrated over 25 years of previously recognized service
- Joann Mitchell Outstanding Legacy Award
- Faculty/Staff Award
- Graduate or Professional Student Award
- Undergraduate Student Award
- Community Member Award

Nominees must be affiliated with Penn, HUP, Penn Presbyterian Medical Center or Pennsylvania Hospital and/or the local Philadelphia area and have demonstrated:

- Outstanding leadership
- Distinguished service
- Positive impact on the community
- Commitment to enhancing quality of life for and/or serving as a role model for women of color

Joann Mitchell Outstanding Legacy Award nominees must have worked with the Women of Color Executive Planning Committee or have proven support through donations, event involvement and action advocacy of the WOCAP mission.

Nominations must be submitted on or before *October 27, 2023*.

Annenberg's Center for Advanced Research in Global Communication Launches Summer Residency for Early Career Scholars

This summer, six scholars of global media camped out in the Center for Advanced Research in Global Communication (CARGC) office for a week of research, writing, editing, and brainstorming.

The residency is a part of CARGC's greater mission to make the center an open and welcoming space to early career and precariously-employed scholars who might not have the resources or time to focus on research and writing, said the center's director, Aswin Punathambekar.

This first cohort of scholars explored the role of media and communication in political, societal, and cultural changes across the world, from the impact of independent media in Morocco in the aftermath of the Arab Spring to representations of the second-generation South Asian American experience in American television.

"West Philly is, and always has been, a location shaped by global flows and forces," said Dr. Punathambekar. "We have incredibly vibrant migrant communities, multiple universities that attract thousands of international students, a wide range of cultural and religious institutions, food cultures that span the world, and more. The CARGC summer residency will bring together media scholars—and down the road, artists and activists as well—whose work explores how global dynamics shape communities in this region and, by the same token, how people who live and work here re-imagine their social, cultural, and political horizons."

The scholars—Tilottama Karlekar of Temple University, Youngmin Kim of Rutgers University, Annemarie Iddins of Fairfield University, Madhavi Reddi of York College of Pennsylvania, Fernanda Rosa of Virginia Tech, and Celeste Wagner of the University of Florida—made up the inaugural cohort of the CARGC Summer Residency, a program that brings together early career scholars to research and write in community with one another.

During the week, these scholars had the leeway to decide how and when they wanted to use CARGC's office space—apart from a daily group lunch with Dr. Punathambekar, CARGC program coordinator Anastasiya Miazhevich, and senior research manager Eszter Zimanyi.

Residents planned their own co-writing and feedback sessions and even threw a surprise birthday party for a member of their cohort, Annenberg alumna Celeste Wagner, PhD'22.

Dr. Punathambekar believes that by opening CARGC's doors to emerging scholars who are in dialogue with communities across the world, this residency can help cement West Philadelphia as a hub for global media and communication studies.

Penn Nursing: \$1 Million Grant to Support Nursing Education

(continued from page 1)

beginning with the Class of 2025, Penn Nursing would be transitioning from the accelerated Bachelor of Science in Nursing (ABSN) program to the new entry-level MPN degree program. The first cohort of Conway Scholars, graduating in 2024, will be comprised of students enrolled in the final ABSN program.

Be in the Know On-Campus Biometric Screenings This Fall

Penn's 2023-2024 *Be in the Know* wellness campaign, open to all benefits-eligible faculty, staff, and postdoctoral researchers and fellow eligible for the Penn Postdoc Benefits Plan, provides an array of programs and resources to focus on your health and well-being, connect with the Penn community, and earn up to \$300* in Pulse Cash rewards.

This fall, the Penn Healthy You team, in partnership with Health Advocate, will offer on-campus biometric screenings at convenient University locations. Quick, no-cost screening appointments will be held from October 10 through November 30. Advanced registration is required, so sign up for your appointment online at Penn's [Health Advocate portal](#). Log in with your PennKey and password, and follow these steps:

- Click on the "Schedule a Health Screening" tile
- Look for "Attend an Onsite Health Screening Event"
- Click "Schedule"
- Search by available location and follow steps to make your appointment

For a complete list of screening dates and locations, download the [biometric screening schedule](#).

Rewards Start With Your Biometric Screening

Completing a biometric screening is an essential step for *Be in the Know* 2023-2024. It is the only activity required to receive Pulse Cash rewards this year. Biometric screenings also provide you with key indicators about your health and professional feedback on the meaning of your results.

Once you complete your screening between July 1, 2023 and June 30, 2024, you'll earn your first \$50 in Pulse Cash rewards. Health Advocate will automatically send biometric screening results and credit to Virgin Pulse on your behalf. (Please allow at least two weeks for them to appear on the platform). You'll also be able to earn an additional \$250 in Pulse Cash rewards when you complete your choice of over 90 qualifying well-being activities from our 2023-2024 "[Ways to Earn](#)" list. All Pulse Cash rewards are redeemable on the Virgin Pulse platform—allowing you to choose from gift cards, wellness items, and charitable donations.

If you are not enrolled on the Virgin Pulse platform, get started today at <https://join.virgin-pulse.com/penn>.

What to Expect at the Screening

Please bring your PennCard or University ID card to your biometric screening appointment. At the on-campus biometric screening, a Health Advocate representative will measure key components of your overall health:

- Blood pressure
- Total cholesterol
- HDL cholesterol
- Blood sugar/glucose

More Biometric Screening Options

On-campus screenings are an easy way to earn biometric screening credit for *Be in the Know* 2023-2024, but there are other choices to fit your schedule:

- **Submit screening results from your health-care provider:** Obtain a screening between July 1, 2023, and June 30, 2024. Download the [Consent to Release Results form](#), then follow the instructions to submit your confidential results to Health Advocate. Once Health Advocate processes your form, they will automatically send results and credit to Virgin Pulse. Please allow a few weeks for credit to appear on the platform.
- **Two Labcorp options available through Virgin Pulse:** Sign into the Virgin Pulse platform, go to Programs tab and "Biometric Screenings Options, 2023-2024" page for the order links. Click the "START NOW" button on the left side of the screen. Choose from "Labcorp Patient Service Center" (voucher) or "Labcorp OnDemand Home Test" (home test kit). For both options, Labcorp will process your screenings and automatically send results and credit to Virgin Pulse. Labcorp will email you a link to view results. Processing for both options takes several weeks, so please complete them before June 1, 2024.
- **Labcorp Voucher Program:** Download a voucher (screening script) from the Virgin Pulse platform. Schedule and complete a screening appointment at a participating Labcorp facility near you.
- **Home Test Kits:** Order a home test kit on the Virgin Pulse platform. Complete the kit at home, which will include all directions and supplies and mail back the completed kit.

For complete *Be in the Know* 2023-2024 campaign details, including more ways to earn rewards, visit www.hr.upenn.edu/beintheknow.

for Mr. Harris, expanding his artistry in a new direction and collaborating with a lighting design artist to create and debut Mr. Harris' own visual artwork. RHPM company members will also participate in programs at PLA's partner schools in West and North Philadelphia, inviting young people to observe their own communities and respond creatively using a range of artistic media including writing, visual art and hip-hop movement vocabulary.

"I'm so pleased to have this opportunity to spend three years working with the Penn Live Arts team," said Mr. Harris. "Creating at home in Philadelphia grounds and inspires me, and I look forward to this journey that will bring new work to life and have a meaningful impact in my home community."

"We are delighted to welcome Rennie Harris to Penn for this exciting residency," said Penn Provost John L. Jackson, Jr. "Our campus will be energized and educated by his unique art practice, which fuses contemporary dance and music to urgent social issues and a strong commitment to Philadelphia."

U.S. News & World Report 2024 Rankings

In the newly released 2024 *U.S. News & World Report* ranking of United States universities, the University of Pennsylvania was ranked #6—up one spot from last year.

This ranking is calculated from factors including graduation and retention rates, faculty resources, student/faculty ratios, class sizes, SAT/ACT scores, percentage of Pell-grant eligible students, and their graduation performance.

Penn was also ranked #13 in best value schools; #7 in psychology programs; #8 in economics; #9 in programming languages; #25 in undergraduate research/creative projects; #62 in best undergraduate teaching; and #184 in top performers on social mobility.

The Wharton School has retained its #1 post as the best undergraduate business program in the country, which it has held for many years. It is ranked #1 in finance; #2 in marketing, management, and real estate; #3 in quantitative analysis and production/operation management; #4 in international business; #5 in analytics; #6 in entrepreneurship and accounting; #7 in insurance; and #12 in management information systems.

Penn's School of Nursing was again ranked #1 for its undergraduate nursing program. Penn's School of Engineering and Applied Science ranked #19 for best undergraduate engineering programs. Within SEAS, Penn ranked #10 in biomedical engineering.

Honors & Other Things

Donna Huryn: 2024 Garvan-Olin Medal

Donna Huryn, a professor of practice in the department of chemistry of the School of Arts and Sciences, has been selected to receive the 2024 Francis P. Garvan-John M. Olin Medal from the American Chemical Society. The award recognizes distinguished service to chemistry by women chemists in the United States. The award consists of \$5,000, a medallion with a presentation box, and a certificate.

Donna Huryn

The award was established in 1936 through a donation from Francis P. Garvan and has been supported by a fund set up at that time. The medallion was presented at a luncheon held at the ACS spring meeting.

Albert S. "Pete" Kyle: Wharton-Jacobs Levy Prize

The 2023 Wharton-Jacobs Levy Prize for Quantitative Financial Innovation was awarded to Albert S. "Pete" Kyle at a conference hosted by the Jacobs Levy Equity Management Center for Quantitative Financial Research of the Wharton School on September 22 in New York.

Dr. Kyle received the Wharton-Jacobs Levy Prize for his research on market microstructure, based on his 1985 *Econometrica* paper, "Continuous Auctions and Insider Trading." The paper's model of informed trading has been widely used in both academic research and practical applications, such as the development of algorithmic trading strategies.

"Pete Kyle's research on market microstructure was groundbreaking in that it substantially enhanced understanding of the functioning of financial markets for academic researchers and financial practitioners," said Erika James, dean of the Wharton School. "His work embodies Wharton's commitment to elevating the impact of scholarship that advances innovation in finance and the broader business community."

Dr. Kyle is the Charles E. Smith Chair Professor of Finance at the University of Maryland's Robert H. Smith School of Business. His research focuses on market microstructure, including topics such as informed speculative trading, strategic trading, liquidity measurement, the informational content of prices, high-frequency trading, price manipulation, and contagion.

The conference program also featured paper presentations and a panel discussion on advances in market microstructure. The Wharton-Jacobs Levy Prize is an \$80,000 award that is endowed with a \$2 million gift from Bruce I. Jacobs, G'79, GrW'86, and Kenneth N. Levy WG'76, G'82, principals and co-founders of Jacobs Levy Equity Management. It is given biennially to recognize excellence in quantitative research that has contributed to a particular innovation in the practice of finance.

The Division of Human Resources will celebrate members of the Penn community who have worked at the University for 25 or more years at the annual 25 Year Club Celebration. The event will be held on Thursday, October 12 from 5 p.m. to 7 p.m. Registration is required, and attendance is by invitation only.

To attend, please register by Thursday, October 5 at www.hr.upenn.edu/25yearclub.

For more information, call (215) 898-3463 or email 25yearclub@hr.upenn.edu.

Penn Celebrates 2023 National Cybersecurity Awareness Month

October 2023 is the 20th anniversary of National Cybersecurity Awareness Month (NCSAM). In observance of NCSAM, the Office of Information Security (OIS) is holding two events.

On October 12, OIS kicks off the celebration by inviting Penn faculty, staff, and PhD students to attend a one-day Penn Information Security Aware Community (PISAC) hybrid event at John M. Huntsman Hall and via Zoom. PISAC features six sessions with experts presenting in the field of:

- *Cybersecurity & Law* by Claire Finkelstein, a professor of law and philosophy.
- *Information Science, Engineering, and Applied Science* by Professor Jonathan Smith, a professor of computer and information science.
- *Cybersecurity Guidance for Research and Education* by the National Institute of Standards and Technology
- Panel discussion on *Resilience in Cybersecurity* by CISOs from higher education institutions.
- *Cyber Threats Targeting Children and Youth* by the National Center of Missing and Exploited Children
- *Protecting Yourself from Cyber Threats* by the OIS Security Operation Center

OIS will participate in the Employee Resource Fair on *October 24*, held in person at Pottruck Health & Fitness Center. From noon -1:30 p.m., OIS will distribute swag carrying a security message to attendees.

Continuing with OIS's annual tradition, a free movie screening, *The Marvels*, is offered for students on *November 10* at 5:30 p.m., preceded by a brief discussion of the Digital Millennium Copyright Act (DMCA) and Penn's copyright policy.

As a reminder of best security practices, it is essential to:

- Back up the data you handle in a secure location
- Set your file-sharing site to private to prevent unauthorized access
- Verify the authenticity of the email before responding. If in doubt, contact your IT support staff for verification.

Information on event registration is on the Penn 2023 National Cybersecurity Awareness Month webpage.

Thoughts on Teaching STEM With Less Sting

Tobias Baumgart

I would like to begin by thanking all those outstanding teachers at Penn, in the chemistry department and elsewhere, who have allowed me to observe their teaching, either in person or electronically, or who have otherwise been inspiring. My educational journey has benefited tremendously from our learning community, and my ambition is to extend and nurture that community in my classrooms. I am hopeful that more connection and community, and less toxic competition, can help take the sting out of STEM teaching, both for our students and for us instructors.

This community can begin with getting to know many, if not all, the individuals in the classroom. It is challenging to memorize students' names off registration photographs that sometimes seem to bear little resemblance to the current individual in the classroom. Furthermore, the names provided in the course registration table do not always offer guidance on their pronunciation, and some students use a nickname, or prefer to use their middle name. How to get a hold of all of this? I learned from others an ice breaker activity during the first class where each student mentions their name and a fun fact, or—to provide a graceful way out—a favorite color. This only works for small classes. For larger ones, both my students and I have had fun with an assignment that could be completed during a short amount of class time or after class: 1) “Using your phone, submit to Canvas a short audio recording containing your full name, how you would like to be addressed, your choice of pronoun, as well as a fun fact (or favorite color)” and 2) “Provide a current snapshot of yourself (selfie)”. I still cherish some of the fun facts I have learned in past courses, and this activity helped me appreciate the richness of what our students bring to the table. Such fun facts also helped me quite a bit with the process of remembering names in large classes.

For instructors to think about ‘us’ all together, instead of seeing students as ‘other,’ sounds trivial at the surface, and yet it took me more than 10 years of teaching to figure this out for myself. Recognizing that my teaching was not about ‘me’ allowed me to realize that it is OK to make the occasional mistake, and that fully owning my mistakes in front of the students, can be a genuine way of connecting. Vulnerability seems to be a stance too often interpreted as weakness for professionals in our discipline. For the STEM teacher, it may in fact be a strength. I learned from observing my colleagues the power of apologizing, of self-deprecating humor, of being less than a sage-on-the-stage while coming to class with enthusiasm about the material, especially if all this comes with being well-organized and well-prepared.

Using music as a tool (typically in the form of a song played right before class) turned out to be a way to create community and connection in several different ways. Sometimes a short story connects a song to some course material, and some songs address emotional class experiences, such as anxiety and sadness. I have had students suggest a piece that they used as a “pump up” song in past contexts, and these songs became theme songs for our course. Soliciting song suggestions from the class helped me to be more “modern.” It is possible that playing songs of my own (likely more “antiquated”) choice before class may have had a larger effect on me than on anyone else in the classroom and that may have indirectly elevated the classroom atmosphere. I remember fairly emotional moments

when listening, on the evening before class, to the song I would enjoy with my students the next day. For example, I used Kamakawiwo‘Ole’s “Somewhere Over the Rainbow” when covering the blackbody spectrum (such as of the sun), and Ashokan Farewell—a song written about human bonding and theme song for Ken Burns’s documentary on splitting and reuniting North and South—when discussing the chemical bond. I also use a video of Rocky Balboa’s jog through Philadelphia and up the Art Museum steps during the last day of class. Shostakovich’s second waltz and an accompanying video of ballroom dance couples helped illustrate the concept (and misconceptions!) of electron pairing, and a flash mob orchestra adding one instrument after another to play Beethoven’s Ode to Joy, with a whole marketplace eventually participating, illustrated the Aufbau-principle of the periodic table, one of the most amazing insights into chemical principles. These songs helped me to think of my class at an emotional level the students had not experienced before without the help of music.

Online course communication tools (such as EdDiscussion) further improve access to the class outside of class and office hours, especially if they offer students the chance to submit questions, comments, and concerns anonymously. Since the whole teaching team (instructor, graduate teaching assistants, and undergraduate learning assistants) as well as all other students in the course have access to the submissions as well, that too adds community to the course experience.

Finally, I have chosen to never again teach a course where students are graded on a curve. I am aware that there are pros and cons. Given that I never had to take a curved course myself as a student, this choice came easily for me. The arguments that resonate with me are the reduction of toxic competition and the promotion of collaborative learning. In addition, absolute grade schemes allow transparency such that students always know where they stand in the course. Challenges include me having to explain to students why the absolute grade scheme changed from one year to the next, and having to explain to colleagues why the promise that everyone enrolled in the course in principle can come out with an A-grade almost became reality at the end of one semester. Those high grades raised concerns about grade inflation and fairness among different cohorts and different teachers. I’m not sure I have good answers to such concerns. My priority has been the course experience of the individual student in my course.

For those looking for more on teaching effectively and without sting, I highly recommend Kelly Hogan and Viji Sathy’s text “Inclusive Teaching,” which offers a plethora of ideas to work towards creating a class that welcomes students, Claude Steele’s “Whistling Vivaldi,” a book that can help instructors better understand why some students struggle even though they are capable, and Daniel Willingham’s “Why Don’t Students Like School,” on how the mind works and what that means for the teacher. Those books, along with numerous articles on positive psychology and inclusive teaching, have helped form my current teaching philosophy. But I have had a little more help. In closing, I’d like to thank one inspiring high school instructor who in addition to teaching us sports and French showed “that the powerful play goes on, and you may contribute a verse.”
